

RAPPLON TGE4RQ

Quick Splice Belting For the Newspaper, Publishing House
and Commercial Printing & Graphics Community

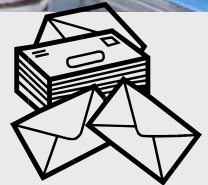

Splicing TGE4RQ
with QSP 60 Press

Features & Benefits

- » Can be quick spliced on your equipment shortening common 2 day installs to just a matter of hours!
- » No hazardous adhesives required!
- » Stable belt lengths as is not affected by humidity changes and temperature fluctuations.
- » Splices are uniform and smooth reducing the possibilities of jams or similarly related production problems.
- » Finger join allows for Bi-directional run eliminating need for splice orientation.

TGE4RQ is commonly used to replace nylon core types such as F-1 and others on equipment such as KBA, Muller Martini, Ferag, MBO, Stahl, Gammerler etc.

See back for additional information.

Easy change out, same properties...

The TGE4RQ has essentially the same frictional properties and thickness as the F-1 commonly used but adds the advantage of instant installation with the quick melt splice! No hazardous glues, no MSDS sheets to maintain, no mess!

Testimonials

Field Report

Ringier Print - *One of the largest print house and media providers in Europe*

Last December, we equipped one process line with the TG E4 RQ. The customer was very surprised about the quick change of all belts. It took only a third of the time to change over the line compared to the normally used F-1 mounting. It has been several months now and the TGE4RQ belts are running smoothly, two shifts per day. The customer is satisfied with the function and performance, and is very happy about the dimensional stability under humid conditions.

TGE4RQ quick splice tape is available in any required width and length pre-cut for field fitting, or in rolls at your specified application width for easy preparation and installation on site.

QSP60/F50 Deluxe splice kit allows for easy preparation and fast professional installation of the TGE4RQ in just minutes!

Splicing rails sold separately in your individually required width.

Not just the right belt for your printing equipment but the best solutions for your overall printing and document handling needs. All this is just a phone call away. Try all our other cost saving products today!
